Wholesale Price List to the Trade

BARRINGTON GREENHOUSES

HOUSE PLANT SPECIALISTS

860 Clements Bridge Road

Barrington, N. J.

Phone Lincoln 7-0168

We are growers of one of the largest selections of house plants, for the trade, in the United States. Think of what this can mean to YOU! We lay no claim to being the biggest growers, nor to having the most greenhouses. But we can increase your pot plant business considerably. You can't sell a Philodendron to the same customer every week. But, chances are, you can sell her something different every week, if you have a wide variety to offer. Our greenhouses contain over 500 varieties of house plants. Maintaining adequate stocks of everything continually is virtually impossible. This list does contain items generally available from our greenhouses all the time. And here at the greenhouses, you can pick from hundreds of other varieties ready in various amounts from time to time. Or our salesman will be glad to call on you with samples of current choice offerings, whenever you wish.

Terms, net cash. Minimum order \$20, for delivery or express. NO minimum necessary at the greenhouses. Most of our plants are in attractive plastic pots that require less watering than clay pots, are much cleaner, and have more sales appeal. Some succulents and cacti are in 2" pots. Unless otherwise stated, all other plants are offered in 2¼" and 2½" pots.

Use this list for your order form. We'll send another.

ALL PROFIT PLANT SERVICE

⌘ This unique plant supply service is the backbone of our business.⌘
Customers who buy for their stores through this system have no head-
⌘ aches about dead or unsalable plants. No bad buys to worry about.⌘
No ordering to remember. In short, no loss, all profit, for we allow
⌘ full credit for unsalable plants every week (unless neglected, unwatered,⌘
etc.) Our representative visits your store weekly, taking returns on
⌘ unsalable plants, and checking to see what you need for the following⌘
week. Plants are delivered at the best time. Orders are made up in
⌘ wide assortment, giving you a well balanced display, rather than 99%⌘
Philodendron. Our experience in selling thousands upon thousands of
⌘ plants and hundreds of varieties, enables us to offer this proven plan,⌘
knowing what will sell and what will not, without the guesswork. All
plants are desirable, healthy plants, such as we would select for our
⌘ own windowsill. And such as the retailer has every right to expect.⌘
If they were not, we would be obligated through this service, to take
⌘ them back the next week. This is an unparalleled plant supply service⌘
which a keen buyer immediately realizes. Naturally, such a service
⌘ cannot be given if plants are purchased from a number of sources.⌘
However, with one of the largest selections of pot plants in the
⌘ country at your doorstep, you'll find no need for numerous sources⌘
of supply. This service is available to any store able to sell 100 or
⌘ more plants per week. Our representative would be pleased to call⌘
on you to discuss this highly profitable service in more detail.
